

# EVP Microphone

by Digital Dowsing LLC.

## The EVP Microphone is easy to use:

1. The 1/8 inch "3.5mm" jack is designed to plug in to the microphone input of most standard recording devices.
2. Simply plug the EVP Microphone into your audio recorder and record as normal.

## How does the EVP Microphone work?

The EVP Microphone is high impedance inductive microphone designed to capture EMF. THE EVP microphone will not capture Audio, only electromagnet energy.

- Use in place of standard microphone for EVP recording
- No batteries required
- Simply plug into recording device
- 1/8" microphone jack
