

EVP Receiver

Setup

1. Install 3 AAA NEW Batteries, *not included*.
 2. Carefully attach lens by turning clockwise. Remove after use for ease of storage.
 3. Use the included audio cable to connect the EVP Receiver to a recording device or amplifier for real time EVP.
 4. Turn on EVP Receiver.
- Optional* - Mount the EVP Receiver to a tripod.

How to use

You'll need a green or red laser pointer.

Aim the pointer at a reflective surface and align the receiver with the reflected beam. The audio will output to your attached audio device. *Never point the laser at anyone's eyes.*
